

PRODUCT INFORMATION

BORPower® NanoFuel ForOne Diesel Particulate Filter Cleaner (DPF)

About the product

Nano technological particulate filter cleaner, designed for cleaning and renewal clogged diesel particulate filter (DPF) for diesel vehicle engines.

The product is miscible used in all diesel engines and with all diesel fuels. Specifically, short-haul trucks and city vehicles are mainly affected by the problem of clogged diesel particulate filter.

Your advantages

- Permanent and complete filter cleaning during vehicle operation
- No installation and removal, no downtime, no interference
- Reduces the ignition temperature of the soot collected in diesel particulate filter
- No formation of secondary emissions
- Prevents freezing
- Solves typical contaminants in diesel particulate filters
- Ensures optimum driveability, engine performance and low fuel consumption
- Reduces operational costs

Application

Shake the bottle for at least 1 minute (the distribution of the nanocrystals). Please fill one bottle (200 ml) of the diesel particulate filter cleaner per 50 liters of fuel in the fuel tank.
